

Portfolio Skill Summary

Reference Website: <https://figma-portfolio-ten.vercel.app/>

Overview

This document captures the website design translation into a skill-style summary of creations and tasks. It highlights the UI theme, color scheme, typography, and component-level work completed in the portfolio project.

Task Categories

- Theme and color system update
- Typography modernization
- Hero section redesign
- Navbar styling refresh
- Component accent and layout upgrades
- Build and verify changes

Key Creations

The following creations were implemented as part of the design update:

- A rich purple dark mode palette with violet accent gradients
- Glassmorphism card styles for stats, services, and forms
- Button system with purple gradient primary buttons and subtle secondary styles
- Poppins typography across the app for a modern editorial tone
- Updated project card accent tags and hero copy layout

File Changes

Files updated during this skill creation:

- app/globals.css
- app/layout.tsx
- components/Navbar.tsx
- components/Hero.tsx
- components/Expertise.tsx
- components/Portfolio.tsx
- components/Contact.tsx

- components/Footer.tsx
- components/Timeline.tsx

Verification Notes

The updated portfolio was run successfully in development mode. The production build process had unrelated Next.js page export path issues in the workspace, but the UI theme and component updates were confirmed visually.
